Richard is still looking for someone to take on the organizational role while he remains in support, Beki reported that Mark is considering this and will discuss with Richard. Relocation of hives proposed to the more accessible site next to the small polytunnel, could be done in the autumn, and bee equipment stored in garage with tool library items. • Veg: More seeds will be shared out as season progresses. More muck has been delivered and can be used to mulch empty beds which will be used later in the season. The pair teams are doing great work and the garden is looking very organized, hopefully the group can reconvene after March 29th and socialise again. <p>Ducks: Auto door is now working and the new ducks settling in, 2-4 eggs being laid should soon rise to 6 per day.</p> <p>Goats: Blossom and Fern are both back from visiting the billy. The paddock has been rested for over three weeks and recent cold weather should have cleared the worms. The maternity shelter needs cleaning out and repair to some walls. Beki is sourcing some beet fodder to augment browsing and hay, no concentrates to be fed until milking starts again to encourage the goats to range more widely on the field, use raw fresh vegetable scraps for treats.</p> | |
